PLANT SCIENCE

Subject index

Volume 97 (1994)

Abscisic acid, *Beta vulgaris* L., storage organ, minibeet, polycambial structure, sucrose accumulation, 217
Abscisic acid, hardening, cold acclimation, low-temperature, cold regulated protein, barley (*Hordeum vulgare*), 39
Acclimatization, chilling, ELISA, *Paeonia suffruticosa*, plant hormones, reactivation, 153
Acid protease, *Hordeum vulgare*, Etioplast, NADPH-protochlorophyllide oxidoreductase, *N*-ethylmaleimide, 129
Agrobacterium, β-glucuronidase, chrysanthemum, somatic embryogenesis, transgenosis, 95
Aluminium, *Lactarius piperatus*, cytokinins, immunoaffinty chromatography, high performance liquid chromatography, *Amaranthus* bioassay, 137
Amaranthus bioassay, *Lactarius piperatus*, cytokinins, aluminium, immunoaffinty chromatography, high performance liquid chromatography, 137
Arabidopsis thaliana, *Cucumis sativus*, *Nicotiana tabacum*, polyamines, protein phosphorylation, 109

Barley (*Hordeum vulgare*), hardening, cold acclimation, low-temperature, cold regulated protein, abscisic acid, 39
Barley, chloroplast, electron transport, genetic variation, photosynthesis, plastocyanin, 177
Beta vulgaris L., storage organ, minibeet, abscisic acid, polycambial structure, sucrose accumulation, 217

Carbon metabolism, chloroplasts, cytosol, mitochondria, oxidative electron transport, photosynthesis, respiration, TCA cycle, 1
Catharanthus roseus, microsomal membranes, phospholipases, suspension cultured plant cells, 143
Cell culture, *Nicotiana glauca* (Graham), tree tobacco, plant regeneration, guard cell protoplasts, 199
Cell culture, *Vitis* spp., vitaceae, grapes, freezing tolerance, cold tolerance, 69
Chalcone synthase (CHS), transient gene expression, mustard (*Sinapis alba* L.), light-responsive element (LRE), photoreceptors, DNA-binding proteins, 189
Chilling, acclimatization, ELISA, *Paeonia suffruticosa*, plant hormones, reactivation, 153
Chloroplast, barley, electron transport, genetic variation, photosynthesis, plastocyanin, 177
Chloroplasts, carbon metabolism, cytosol, mitochondria, oxidative electron transport, photosynthesis, respiration, TCA cycle, 1
Chrysanthemum, *Agrobacterium*, β-glucuronidase, somatic embryogenesis, transgenosis, 95
Cicer arietinum, ethylene, polyamines, germination, 31
Cold acclimation, hardening, low-temperature, cold regulated protein, abscisic acid, barley (*Hordeum vulgare*), 39
Cold regulated protein, hardening, cold acclimation, low-temperature, abscisic acid, barley (*Hordeum vulgare*), 39
Cold tolerance, *Vitis* spp., vitaceae, grapes, freezing tolerance, cell culture, 69
Cucumis sativus, *Arabidopsis thaliana*, *Nicotiana tabacum*, polyamines, protein phosphorylation, 109
Cytofluorometry, *Myrothecium roridum*, in vitro selection, transmembrane electrical potential, merocyanine 540, 15
Cytokinins, *Lactarius piperatus*, aluminium, immunoaffinty chromatography, high performance liquid chromatography, *Amaranthus* bioassay, 137
Cytoplasmic male-sterility, *Vicia faba*, virus-like particles, monoclonal antibodies, ELISA, 103
Cytosol, carbon metabolism, chloroplasts, mitochondria, oxidative electron transport, photosynthesis, respiration, TCA cycle, 1

Developing maize endosperm, UDP-Glc:protein transglucosylase, protein acceptor, *Zea mays*, 119
Differentiation, endopolyploidy, flow cytometry, *Lycopersicon esculentum* L., polysomaty, tomato, 53
Disease resistance, organogenesis, somatic embryogenesis, protoplasts, micro-cross sections, root organ cultures, hybrid poplar, intraclonal variation, somaclonal variation, 209
DNA-binding proteins, transient gene expression, mustard (*Sinapis alba* L.), chalcone synthase (CHS), light-responsive element (LRE), photoreceptors, 189
Electron transport, barley, chloroplast, genetic variation, photosynthesis, plastocyanin, 177
ELISA, *Vicia faba*, cytoplasmic male-sterility, virus-like particles, monoclonal antibodies, 103
ELISA, acclimatization, chilling, *Paeonia suffruticosa*, plant hormones, reactivation, 153
Endogenous β-glucuronidase activity, methanol, transgenic

SSDI 0168-9452(94)03855-4

plants, plant gene expression, *Nicotiana tabacum*, *gus* A gene, 61
Endopolyploidy, differentiation, flow cytometry, *Lycopersicon esculentum* L., polysomaty, tomato, 53
Enzyme latency, *Glycine max*, MgATPase, NADH-ferricyanide oxidoreductase, plasma membrane, vesicle sidedness, 47
Ethylene, polyamines, *Cicer arietinum*, germination, 31
Etioplast, *Hordeum vulgare*, NADPH-protochlorophyllide oxidoreductase, acid protease, *N*-ethylmaleimide, 129

Flow cytometry, differentiation, endopolyploidy, *Lycopersicon esculentum* L., polysomaty, tomato, 53
Freezing tolerance, *Vitis* spp., vitaceae, grapes, cold tolerance, cell culture, 69

Galactan synthases, glucan synthases, pectin methyl esterase, peroxidases, pectin methyl transferase, *Linum usitatissimum* L., 161
Gene transfer to protoplasts, turf and forage grasses, red or golf course fescue (*Festuca rubra*), suspension cultures, plant regeneration from protoplasts, transgenic plants, 83
Genetic variation, barley, chloroplast, electron transport, photosynthesis, plastocyanin, 177
Germination, ethylene, polyamines, *Cicer arietinum*, 31
Glucan synthases, galactan synthases, pectin methyl esterase, peroxidases, pectin methyl transferase, *Linum usitatissimum* L., 161
β-Glucuronidase, *Agrobacterium*, chrysanthemum, somatic embryogenesis, transgenosis, 95
Glycine max, enzyme latency, MgATPase, NADH-ferricyanide oxidoreductase, plasma membrane, vesicle sidedness, 47
Grapes, *Vitis* spp., vitaceae, freezing tolerance, cold tolerance, cell culture, 69
Guard cell protoplasts, *Nicotiana glauca* (Graham), tree tobacco, cell culture, plant regeneration, 199
gus A gene, methanol, endogenous β-glucuronidase activity, transgenic plants, plant gene expression, *Nicotiana tabacum*, 61

Hardening, cold acclimation, low-temperature, cold regulated protein, abscisic acid, barley (*Hordeum vulgare*), 3
Heat shock gene, heat shock protein, stress protein, maize genetics, 169
Heat shock protein, heat shock gene, stress protein, maize genetics, 169 Heat shock proteins, high molecular weight, quantitation, rice (*Oryza sativa* L.), 23
High molecular weight, heat shock proteins, quantitation, rice (*Oryza sativa* L.), 23 High performance liquid chromatography, *Lactarius piperatus*, cytokinins, aluminium, immunoaffinty chromatography, *Amaranthus* bioassay, 137
Hordeum vulgare, Etioplast, NADPH-protochlorophyllide oxidoreductase, acid protease, *N*-ethylmaleimide, 129
Hybrid poplar, organogenesis, somatic embryogenesis, protoplasts, micro-cross sections, root organ cultures, disease resistance, intraclonal variation, somaclonal variation, 209

Immunoaffinty chromatography, *Lactarius piperatus*, cytokinins, aluminium, high performance liquid chromatography, *Amaranthus* bioassay, 137
In vitro selection, *Myrothecium roridum*, transmembrane electrical potential, merocyanine 540, cytofluorometry, 15
Intraclonal variation, organogenesis, somatic embryogenesis, protoplasts, micro-cross sections, root organ cultures, disease resistance, hybrid poplar, somaclonal variation, 209

Lactarius piperatus, cytokinins, aluminium, immunoaffinty chromatography, high performance liquid chromatography, *Amaranthus* bioassay, 137
Light-responsive element (LRE), transient gene expression, mustard (*Sinapis alba* L.), chalcone synthase (CHS), photoreceptors, DNA-binding proteins, 189
Linum usitatissimum L., glucan synthases, galactan synthases, pectin methyl esterase, peroxidases, pectin methyl transferase, 161
Low-temperature, hardening, cold acclimation, cold regulated protein, abscisic acid, barley (*Hordeum vulgare*), 39
Lycopersicon esculentum L., differentiation, endopolyploidy, flow cytometry, polysomaty, tomato, 53
Maize genetics, heat shock protein, heat shock gene, stress protein, 169
Merocyanine 540, *Myrothecium roridum*, in vitro selection, transmembrane electrical potential, cytofluorometry, 15
Methanol, endogenous β-glucuronidase activity, transgenic plants, plant gene expression, *Nicotiana tabacum*, *gus* A gene, 61
MgATPase, enzyme latency, *Glycine max*, NADH-ferricyanide oxidoreductase, plasma membrane, vesicle sidedness, 47
Micro-cross sections, organogenesis, somatic embryogenesis, protoplasts, root organ cultures, disease resistance, hybrid poplar, intraclonal variation, somaclonal variation, 209
Microsomal membranes, *Catharanthus roseus*, phospholipases, suspension cultured plant cells, 143
Minibeet, *Beta vulgaris* L., storage organ, abscisic acid, polycambial structure, sucrose accumulation, 217
Mitochondria, carbon metabolism, chloroplasts, cytosol, oxidative electron transport, photosynthesis, respiration, TCA cycle, 1
Monoclonal antibodies, *Vicia faba*, cytoplasmic male-sterility, virus-like particles, ELISA, 103
Mustard (*Sinapis alba* L.), transient gene expression, chalcone synthase (CHS), light-responsive element (LRE), photoreceptors, DNA-binding proteins, 189
Myrothecium roridum, in vitro selection, transmembrane electrical potential, merocyanine 540, cytofluorometry, 15

N-ethylmaleimide, *Hordeum vulgare*, Etioplast, NADPH-protochlorophyllide oxidoreductase, acid protease, 129
NADH-ferricyanide oxidoreductase, enzyme latency, *Glycine max*, MgATPase, plasma membrane, vesicle sidedness, 47
NADPH-protochlorophyllide oxidoreductase, *Hordeum vulgare*, Etioplast, acid protease, *N*-ethylmaleimide, 129
Nicotiana glauca (Graham), tree tobacco, cell culture, plant regeneration, guard cell protoplasts, 199
Nicotiana tabacum, *Arabidopsis thaliana*, *Cucumis sativus*, polyamines, protein phosphorylation, 109

Nicotiana tabacum, methanol, endogenous β-glucuronidase activity, transgenic plants, plant gene expression, *gus* A gene, 61

Organogenesis, somatic embryogenesis, protoplasts, micro-cross sections, root organ cultures, disease resistance, hybrid poplar, intraclonal variation, somaclonal variation, 209

Oxidative electron transport, carbon metabolism, chloroplasts, cytosol, mitochondria, photosynthesis, respiration, TCA cycle, 1

Paeonia suffruticosa, acclimatization, chilling, ELISA, plant hormones, reactivation, 153

Pectin methyl esterase, glucan synthases, galactan synthases, peroxidases, pectin methyl transferase, *Linum usitatissimum* L., 161

Pectin methyl transferase, glucan synthases, galactan synthases, pectin methyl esterase, peroxidases, *Linum usitatissimum* L., 161

Peroxidases, glucan synthases, galactan synthases, pectin methyl esterase, pectin methyl transferase, *Linum usitatissimum* L., 161

Phospholipases, *Catharanthus roseus*, microsomal membranes, suspension cultured plant cells, 143

Photoreceptors, transient gene expression, mustard (*Sinapis alba* L.), chalcone synthase (CHS), light-responsive element (LRE), DNA-binding proteins, 189

Photosynthesis, barley, chloroplast, electron transport, genetic variation, plastocyanin, 177

Photosynthesis, carbon metabolism, chloroplasts, cytosol, mitochondria, oxidative electron transport, respiration, TCA cycle, 1

Plant gene expression, methanol, endogenous β-glucuronidase activity, transgenic plants, *Nicotiana tabacum*, *gus* A gene, 61

Plant hormones, acclimatization, chilling, ELISA, *Paeonia suffruticosa*, reactivation, 153

Plant regeneration, *Nicotiana glauca* (Graham), tree tobacco, cell culture, guard cell protoplasts, 199

Plant regeneration from protoplasts, turf and forage grasses, red or golf course fescue (*Festuca rubra*), suspension cultures, gene transfer to protoplasts, transgenic plants, 83

Plasma membrane, enzyme latency, *Glycine max*, MgATPase, NADH-ferricyanide oxidoreductase, vesicle sidedness, 47

Plastocyanin, barley, chloroplast, electron transport, genetic variation, photosynthesis, 177

Polyamines, ethylene, *Cicer arietinum*, germination, 31

Polyamines, *Arabidopsis thaliana*, *Cucumis sativus*, *Nicotiana tabacum*, protein phosphorylation, 109

Polycambial structure, *Beta vulgaris* L., storage organ, minibeet, abscisic acid, sucrose accumulation, 217

Polysomaty, differentiation, endopolyploidy, flow cytometry, *Lycopersicon esculentum* L., tomato, 53

Protein acceptor, UDP-Glc:protein transglucosylase, developing maize endosperm, *Zea mays*, 119

Protein phosphorylation, *Arabidopsis thaliana*, *Cucumis sativus*, *Nicotiana tabacum*, polyamines, 109

Protoplast culture, *Trifolium pratense* L., somatic embryogenesis, 75

Protoplasts, organogenesis, somatic embryogenesis, micro-cross sections, root organ cultures, disease resistance, hybrid poplar, intraclonal variation, somaclonal variation, 209

Quantitation, heat shock proteins, high molecular weight, rice (*Oryza sativa* L.), 23

Reactivation, acclimatization, chilling, ELISA, *Paeonia suffruticosa*, plant hormones, 153

Red or golf course fescue (*Festuca rubra*), turf and forage grasses, suspension cultures, plant regeneration from protoplasts, gene transfer to protoplasts, transgenic plants, 83

Respiration, carbon metabolism, chloroplasts, cytosol, mitochondria, oxidative electron transport, photosynthesis, TCA cycle, 1 Rice (*Oryza sativa* L.), heat shock proteins, high molecular weight, quantitation, 23

Root organ cultures, organogenesis, somatic embryogenesis, protoplasts, micro-cross sections, disease resistance, hybrid poplar, intraclonal variation, somaclonal variation, 209

Somaclonal variation, organogenesis, somatic embryogenesis, protoplasts, micro-cross sections, root organ cultures, disease resistance, hybrid poplar, intraclonal variation, 209

Somatic embryogenesis, *Agrobacterium*, β-glucuronidase, chrysanthemum, transgenosis, 95

Somatic embryogenesis, *Trifolium pratense* L., protoplast culture, 75

Somatic embryogenesis, organogenesis, protoplasts, micro-cross sections, root organ cultures, disease resistance, hybrid poplar, intraclonal variation, somaclonal variation, 209

Storage organ, *Beta vulgaris* L., minibeet, abscisic acid, polycambial structure, sucrose accumulation, 217

Stress protein, heat shock protein, heat shock gene, maize genetics, 169

Sucrose accumulation, *Beta vulgaris* L., storage organ, minibeet, abscisic acid, polycambial structure, 217

Suspension cultured plant cells, *Catharanthus roseus*, microsomal membranes, phospholipases, 143

Suspension cultures, turf and forage grasses, red or golf course fescue (*Festuca rubra*), plant regeneration from protoplasts, gene transfer to protoplasts, transgenic plants, 83

TCA cycle, carbon metabolism, chloroplasts, cytosol, mitochondria, oxidative electron transport, photosynthesis, respiration, 1

Tomato, differentiation, endopolyploidy, flow cytometry, *Lycopersicon esculentum* L., polysomaty, 53

Transgenic plants, methanol, endogenous β-glucuronidase activity, plant gene expression, *Nicotiana tabacum*, *gus* A gene, 61

Transgenic plants, turf and forage grasses, red or golf course fescue (*Festuca rubra*), suspension cultures, plant regeneration from protoplasts, gene transfer to protoplasts, 83

Transgenosis, *Agrobacterium*, β-glucuronidase, chrysanthem-

um, somatic embryogenesis, 95 Transient gene expression, mustard (*Sinapis alba* L.), chalcone synthase (CHS), light-responsive element (LRE), photoreceptors, DNA-binding proteins, 189

Transmembrane electrical potential, *Myrothecium roridum*, in vitro selection, merocyanine 540, cytofluorometry, 15

Tree tobacco, *Nicotiana glauca* (Graham), cell culture, plant regeneration, guard cell protoplasts, 199 *Trifolium pratense* L., protoplast culture, somatic embryogenesis, 75

Turf and forage grasses, red or golf course fescue (*Festuca rubra*), suspension cultures, plant regeneration from protoplasts, gene transfer to protoplasts, transgenic plants, 83

UDP-Glc:protein transglucosylase, protein acceptor, developing maize endosperm, *Zea mays*, 119

Vesicle sidedness, enzyme latency, *Glycine max*, MgATPase, NADH-ferricyanide oxidoreductase, plasma membrane, 47

Vicia faba, cytoplasmic male-sterility, virus-like particles, monoclonal antibodies, ELISA, 103

Virus-like particles, *Vicia faba*, cytoplasmic male-sterility, monoclonal antibodies, ELISA, 103

Vitaceae, *Vitis* spp., grapes, freezing tolerance, cold tolerance, cell culture, 69

Vitis spp., vitaceae, grapes, freezing tolerance, cold tolerance, cell culture, 69

Zea mays, UDP-Glc:protein transglucosylase, protein acceptor, developing maize endosperm, 119
